

# This is a minimal working example for using bibunits with REVTeX 4.1

Leo Fang<sup>1</sup>

<sup>1</sup>*Department of Physics, Duke University, P.O. Box 90305, Durham, North Carolina 27708-0305, USA*

(Dated: August 2, 2017)

We investigate this and that, and we find this and that, which we think worth publishing on PRL.

This is all about blahblahblah [1–3]. In this work, we find that

$$E = mc^2, \quad (1)$$

and Eq. (1) is our main result.

*Acknowledgments.* Thank you very much.

# Supplemental Material for “This is a minimal working example for using bibunits with REVTeX 4.1”

Leo Fang  
(Dated: August 2, 2017)

I am citing other references not cited in the main text [S1, S2]. Now cite the papers already appeared in the main text, but in different order [S3–S5].

Now I present a new equation

$$F = ma \tag{S1}$$

and then I refer to it (S1). Now I refer the equation in the main text (1).
